Addis Ababa, Ethiopia

Versatile Full-Stack Engineer with a proven track record of delivering end-to-end digital solutions that prioritize technical efficiency, scalability, and user-centric design. Deeply committed to engineering excellence, I focus on building high-performance web and mobile platforms with robust backend architectures. Having completed over 50 projects across healthcare, enterprise finance, recruitment platforms, and consumer applications, I transform complex organizational challenges into streamlined, reliable digital experiences.

EDUCATION

Addis Ababa University
BSc in Software Engineering
Expected 2028

National Achievement
Top 10 National Scorer in ESSLCE (Ethiopian School Leaving Certificate Exam)
2023

Self-Directed Study
Completed over 50 projects in Full-Stack, Mobile, and Systems Engineering.

TECHNICAL SKILLS

LANGUAGES
JavaScript (ES6+), TypeScript, Python
SQL (PostgreSQL), C++, Java, Dart, PHP

FRONTEND
React, Next.js, Vite, TypeScript
Tailwind CSS, Framer Motion, HTML5/CSS3

MOBILE
React Native, Expo, Flutter, Dart
Cross-Platform (iOS/Android), Offline-First

BACKEND & APIS
Express.js, RESTful APIs, Prisma ORM
TypeORM, Drizzle ORM, Supabase, Firebase

SYSTEMS & ARCHITECTURE
System Design, Relational DBs, Redis, Bull
Linux / Ubuntu, Concurrency, Git, Docker

LANGUAGES

English: Professional Proficiency
Amharic / Oromo: Native

WORK EXPERIENCE

Junior Full-Stack Developer — *Mereb Technologies*

March 2026 – Present | Addis Ababa, Ethiopia

- Contributed to company web platforms and talent recruitment software, engineering both responsive frontends and modular backend services.
- Participated in feature development, bug resolution, and performance tuning to deliver scalable, high-quality client solutions.

Full-Stack & Mobile App Developer — *Tech Med*

January 2026 – August 2026 | Healthcare Systems

- Spearheaded development of healthcare digital platforms, creating intuitive patient management systems, web portals, and mobile app features.
- Integrated secure Express.js API endpoints and optimized frontend responsiveness to streamline clinical workflows and patient engagement.

FEATURED PROJECTS

Mereb Website & Mereb Talent ATS — mereb.tech • talent.mereb.tech

Role: Full-Stack Developer & Web Designer

- Designed and developed Mereb's corporate web platform (Next.js 16, React 19, Tailwind CSS) with sleek animations and responsive UI/UX.
- Engineered the Mereb Talent ATS platform using Next.js, Express.js, TypeScript, PostgreSQL (TypeORM), and Bull queues for automated applicant tracking.

Lean Finance Verification System — *Enterprise Financial Platform*

Role: Full-Stack Developer & Project Lead

- Led architecture and end-to-end development of an automated financial auditing and verification platform using Express.js, TypeScript, Prisma, and PostgreSQL.
- Engineered reconciliation algorithms for bank statements, general ledgers, and vendor accounts, integrating OCR document parsing for verification.

Jegnit – Pregnancy & Maternal Health Tracker — Google Play

Role: App Developer

- Built and published a bilingual (English & Amharic) mobile app on Google Play using React Native (Expo) and an Express.js / PostgreSQL backend.
- Implemented pregnancy stage calculators, weekly fetal development milestones, and personalized maternal tracking with offline-first capabilities.

HealthNet & HealthNet Mobile App — health-net-ethiopia.vercel.app

Role: Full-Stack Developer & Mobile App Developer (Personal Projects)

- Engineered an integrated hospital management system (React, Express.js, PostgreSQL) with a companion mobile app (React Native / Expo).
- Centralized electronic health records (EHR), clinical scheduling, and patient notifications, reducing paperwork processing time by 90%.

"Dedicated to building impactful digital solutions that bridge technical complexity and user-centric design."
